## DIY TIPS

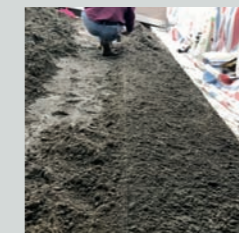

### 1 PREPARATION

Make sure the floor or wall surfaces to be smooth, flat, solid, dry and perfectly clean. We suggest the tiles install direction should be fit for your design.

### 2 PREPARATION FOR PAVING

Confirm code number, size, shade and quantity before opening the box. For the directional design, please follow the right direction to pave the tiles.

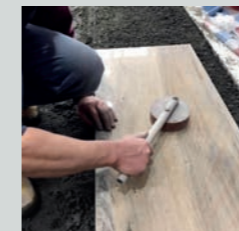

### 3 PAVING

Suggest to paving with cement for ceramic tiles, and cement mixture tile glue grout for porcelain tiles. Ceramic tiles need to dip in water until soaked before paving. Tap the tiles with hammer handle to make it pave firmly.

### 4 FILLING

Tips for filling gap: porcelain floor tile 3-5mm, glazed tile 5mm-10mm, inner wall tile 1.5mm, out door wall tile 3mm. Using cement to fill the gap. Or you can mix color with filler to fill it according to specific design.

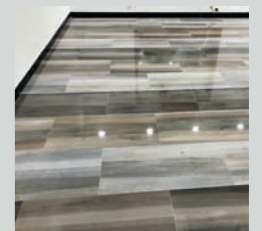

### 5 CLEANING

After paving 1 hour, using a damp sponge to remove any cement or grout. After 12 hours, tap the tile with hammer handle and listen to the sound, if you find empty drum, please remove and pave again. After 24 hours, you can wash and walk on it freely.

### 6 MAINTENANCE

Using normal neutral detergents for daily cleaning. Using a slightly acidic detergents for special cleaning.

# CEMENT TILES

Enlightened by weathered and worn cement surface, the grey tone of CEMENT TILES deliver the toughness and historic charm. For indoors, CEMENT TILES are perfect in matching solid wood, fabric and leather furnitures, and lighten up the high fashion avant garde temperament.

Caria Ceniza  
Size:600x600mm
